

Evacuation Plan Floor 3

© WWW.SAFETYMAP.COM 2008

IN CASE OF EMERGENCY DO NOT USE ELEVATORS - USE EXIT STAIRWAYS

If you hear a fire alarm, feel doors for heat:

If warm

- Do not open door
- Place a blanket or towel at the base of the door
- If there is a phone in the room, report your situation by calling 911
- Stay where you are and proceed to an exterior window and call for help

If normal temperature:

- Open the door slowly
- Leave and close the door
- Follow the safest exit route

Assist individuals with mobility disabilities to a safe location, i.e.

Call 911 and report the fire location, injuries and trapped or disabled individuals.

Report information concerning the emergency to responding police and fire personnel

If a fire starts that is beyond your control to extinguish:

- Call 911
- Activate the nearest fire alarm pull station
- Close the door as you leave to contain the fire
- Follow the safest exit route
